To secure a challenging position where I can effectively contribute my skills as a Full stack developer possessing competent technical skills. Passionate for developing conceptual concepts into real-life working models, incorporate excellent problem-solving skills in various development stages. Believe in ability to perform well in a team.

## PERSONAL PROJECTS

### React Recipe Finder App (06/2021 - 08/2021)                *Link*
- With the help of ReactJs, created a react app which takes food dishes input from the user and print it's recipe.
- Use of React DOM mainly javascript, html, and css.

### Front End Scribbler Project (03/2021 - 04/2021)          *Link*
- Main focus on showing posts and creating post
- Used Html, JavaScript to have some functionality and CSS, so it can look more attractive
